JAY ROHIT

B.Tech Information Technology Student | Python & Web Developer | Math Content Creator
GitHub: github.com/jayrohit0310 | LinkedIn: linkedin.com/in/jay-rohit-8204ab320

EDUCATION

Bachelor of Technology (B.Tech) - Information Technology
Focus: Data Structures, Algorithms, Full-Stack Web Development, Database Management, and Mathematics.

TECHNICAL SKILLS

- **Programming Languages:** C++, Python, JavaScript
- **Frontend Development:** HTML5, CSS3, React, Next.js, Tailwind CSS, Responsive Design
- **Backend Development:** Flask, FastAPI, Node.js, RESTful APIs, Serverless Functions
- **Databases:** MongoDB, PostgreSQL, MySQL
- **Tools & Platforms:** Git, GitHub, VS Code, Vercel, Docker

FEATURED PROJECTS

- **Math+AI Learning Platform:** Modern web application combining mathematics problem solving with AI assistance.
- **Personal Portfolio & AI Assistant:** Full-stack portfolio powered by Flask, interactive chat, visitor tracking & animated UI.
- **Stock Portfolio Tracker:** Real-time stock price tracker with automated portfolio balance and history visualization.
- **Restaurant Order Management System:** Desktop billing and order tracking application with data persistence.
- **Python Automation Suite:** Productivity scripts for web scraping, file classification, and data processing.

ACHIEVEMENTS & CERTIFICATIONS

- **Coding Competitions:** Solved 300+ challenges on LeetCode, CodeChef (3-Star rating), HackerRank & Codeforces.
- **Web Development Internship Certificate:** CodeAlpha verification in frontend and API integrations.
- **Foundations of DSA:** Comprehensive algorithm analysis and data structure certification (Coursera).
- **Core Java Specialization:** Advanced object-oriented programming credential (Coursera).
- **Seaborn Visualization & Data Storytelling:** Verified credential in data plotting and visual analysis (DataCamp).
